

## Secure smart copying

*Software to add value to your production printers*

**Why not easily add value to your high performance printers? With Océ CopyMaker software, you can enable high quality, high speed copying in combination with a document scanner and a production printer. You'll maximise your investment by utilising untapped capacity. You'll easily deliver added-value copies and please your customers. And this smart copying software is easy to use, for all of your operators.**

**Océ CopyMaker is designed to smoothly integrate into the industry-leading Océ PRISMAproduction® workflow and output management system—the powerful engine that drives Océ PRISMA® for PoD solution sets, connected to high performance Océ printers. You can also use Océ CopyMaker for reproduction on any printer.**

### **How Océ CopyMaker works—in brief**

To make high quality copies using Océ CopyMaker, all you need to do is follow this easy process.

- Place your documents in your Océ DS10 document scanner; or import TIFF files from networked Océ multi-functional devices with scanning capabilities utilising Océ ScanLogic software
- Open the Océ CopyMaker GUI and choose your settings with the copier-like interface. Choose to use either basic features or those for added-value copying—to improve your documents with image, content and layout make-ready features

# Océ CopyMaker

---

## Océ CopyMaker key features and capabilities in summary

- Automated, single pass copier-like job submission
- Simplex, duplex, portrait and landscape scanning from Océ DS10 scanner automated document feeder (ADF) and glass plate
- Import files from networked scanners using Océ ScanLogic®
- Ability to adjust the brightness level for different document sections
- Zooming capability, 25 - 400 %
- Océ DS10 input scanning speed of up to 54 images per minute (ipm)
- Fully automated de-speckle filter, which cleans up the entire document without destroying raster or halftone images
- Enhancement options for copying, such as cleaning up edges, adjusting margins and eliminating punch holes; page shifting; inserting headers, footers, page numbers with optional prefixes and suffixes, and date annotation
- Standard Bate Stamping with progressional page numbers including prefix and suffix text
- Export scanned document as PDF, TIFF or AFPDS data
- Batch scanning for multiple document stacks

## Additional Océ CopyMaker features

In combination with the Océ PRISMAproduction workflow and output management system, you can activate the following additional functionality—

- Printer selection
- Job class, job name and express rights selection
- Attribute-based paper stock selection
- Océ CustomTone® printing

- Selection of output trays
- Finishing support
- Cover pages
- Separator pages
- Blank sheets
- Centred print
- Scaling (to fit to paper size)
- Recto-verso page shift
- Appendage page support
- Advanced Bate Stamping with progressive, unique copy number on each copy of document
- Remote spool access  
(to monitor and delete last-minute Océ CopyMaker jobs)
