Océ TDS600

Multifunctional system for engineering documents

With the Océ TDS600, you can meet your customers' demands for high quality engineering documents and short turnaround times. Easy operation ensures results that are right first time, every time.

This system has the functions to handle all your wide format document needs. Plus the performance and productivity to meet your tightest deadlines. Even for extensive distribution runs of complex, multi-set document packages. And even if there's an unexpected change of plans, the Océ TDS600 has the versatility to handle it on the fly.

Direct printing from applications

Digital copying

Wide format functions for your business

To meet your business needs, the Océ TDS600 lets you choose the functions you need. With the ability to extend them later as your workload changes. The basic Océ TDS600 is a productive engineering printer for formats up to Ao. If required you can add a scanner to make the system into a fast, easy-to-use wide format copier. Additional functions include scan-to-file software for fast conversion of your hard-copy documents into secure digital files. Plus a folder unit that eliminates time-consuming manual work, producing ready-to-distribute folded document sets.

Flexible, modular system configuration

Next to the choice of system functions, the Océ TDS600 offers you flexible options to create the system you need. For example media handling: the Océ TDS600 streamlines your workload and saves you time with up to six media rolls and a sheet feeder on-line. Enabling fast media changes for complex document sets. In addition, the Océ Power Logic controller allows customised print functions and print queue management. Regularly used print settings, media types and formats can be saved and recalled when needed. And single-key selection of software functions saves even more time.

Management

'I want a solution that is easy to use, so that my employees can keep their focus on their job.'

Scan to anywhere

Microfilm viewing, scanning, printing

Easy operation maximises efficiency

Print engine speed is not the only measure of productivity. The ability to produce high-quality documents, day in and day out, also depends on other key factors. For example easy, secure operation, so your users get the results they need every time. Plus assured quality, without the need for extensive test prints. The Océ TDS600 delivers on those requirements, with the unique 'green button' for one-touch setting of all main printing and copying parameters. And with Océ's unmatched range of drivers for the main CAD applications, users have convenient desktop access to all main functions.

Ideal for decentral and central use

With its compact footprint and minimal noise and ozone emissions, the Océ TDS600 is ideal for decentral and departmental placements. Located near to engineering workgroups, it offers easy operation with direct access to media selection and print functions. Plus high-quality prints every time without complex operation. Or in the central printroom environment, the Océ TDS600 gives operators the power and productivity to get the job done when the pressure is on. Concurrent job handling and print management functions enable complex document sets to be produced efficiently, providing the capacity to meet tight deadlines.

Advanced technology and performance

Numerous innovations make the Océ TDS600 the performance leader in its class. For example in instant ‘walk up and copy’ results, with no delays for warming-up. And Océ’s unique Image Logic technology for excellent printing and copying results, whatever the original. Or radiant fusing for outstandingly sharp images every time. The integrated system concept makes operation easier, ensuring that all modules operate together perfectly. From the scanner, through the Océ Power Logic controller, to the printer and folder, as well as software drivers and job submission tools. All making your work easier and more productive.

Eco-design is easy to live with

High performance and productivity are vital, but they are not the only important criteria. Like all Océ products, the Océ TDS600 has been designed with care for the environment in mind. The Océ TDS600 performs unobtrusively in your working area. Its low noise levels will not disturb your knowledge workers, while low waste heat and negligible ozone emissions mean there is no need for special ventilation systems. And with its Energy Star® certification the Océ TDS600 is an energy-efficient solution that saves money and contributes to environmental protection.

Océ partnership programme support

Ensuring that users have fast, future-proof access to the latest software developments, Océ has partnership agreements with leading application vendors. This enables us to provide optimum printing support with high levels integration levels. The widest possible range of job and print settings are supported from within applications such as AutoCAD and CATIA, making your engineers highly productive. In addition, our partnership with Adobe systems facilitates enterprise-wide document distribution and interchange via web-enabled applications.

Total engineering printing solutions

As the world market leader in total engineering printing solutions, Océ has a unique capability in enabling organisations to share information. This includes not only printers, software and complete document systems, but also related expertise in document creation and management processes, enterprise-wide information flows, system architecture and integration. Océ also offers total service and support, from initial consultancy through installation and implementation, right up to training, application support and world-leading maintenance service.

Beyond the Ordinary

Printing for Professionals

Building a sustainable business has always been one of our core business principles. We do this by developing products and services that add value to the document processes of our customers, while minimizing environmental impact. And we conduct our business activities in a socially responsible manner aimed at preventing health, safety and environmental risks.

Océ helps the people who make our world. Companies everywhere use Océ technical documentation systems in manufacturing, architecture, engineering and construction. Each week, high speed Océ printing systems produce millions of transaction documents such as bank statements and utility bills. And in offices around the world, people use Océ professional document systems to keep the wheels of business and government turning. Océ is also at work in publishing on demand, newspaper production, document management outsourcing and wide format colour for spectacular display graphics. It all helps our professional customers go 'Beyond the Ordinary' in printing and document management.
