

## The ultimate solution for your digital archive of large-format documents

### Contex HD ScanStation Repro

#### **PRODUCTIVITY: Build your high-volume digital archive in no time**

The key to productivity for high-volume applications is speed. Not just “inches per second” but actual throughput. The HD ScanStation Repro is able to scan three times as many documents in a day as any other scanner – to help you win projects, boost productivity and lower costs.

With our professional version of the Nextimage software, your workflows become even more productive. Less searching for the right settings, less adjustment to get the right quality, and less waiting to view results. No matter whether you scan maps, technical drawings, posters or art, you’ll always capture every detail, on the first try.

#### **ERGONOMICS: More scanning, less clicking**

Designed to improve large-format document management, the HD ScanStation Repro gives you the best ergonomic conditions. Choose between different height settings and mount the touchscreen to the left or right as you prefer – all to give the scanning operator the best options for a correct working position.

#### **SOLUTION: Improves your workflow**

With the most efficient and advanced large-format scanning solution you get a complete work station including our awarded Nextimage software, to fulfil your need for high-volume scanning. A reliable solution to obtain the best quality image, every time.
