Top performance

- Reduced production costs
- Improved turnaround times
- Maximized flexibility
- Powerful solution out of one hand

You are looking for a high performance workflow and output management system – for your mainframe printing or for your server environment. You need to accommodate the needs of your varying customers in a flexible and reliable way. You have to optimize the utilization of your multi-vendor equipment. You are keen to have full control over your increasing variety and complexity of applications. You should have a close look at Océ PRISMAproduction®.

Océ PRISMAproduction is a highly productive, high-performance workflow and output management system for the commercial and corporate printing marketplace. To centralize and powerfully control you print production and to give you the competitive edge.

Reduce production costs

It is critical in today's production print facilities, in corporate environments as well as in commercial environments, to reduce costs to the absolute minimum. No matter if your business is mainframe or server related. With the powerful automation capabilities of Océ PRISMAproduction you reduce your labor costs and avoid human errors, with optional modules for data conversion and enrichment you reduce costs on application development and finally there are many more opportunities for your business.

Océ PRISMAproduction – save money and ensure your business.

Improve turnaround times

In today's business, the available "print window" is getting smaller each day which results in the urgent demand of reducing the turnaround time. That is exactly what Océ PRISMAproduction is prepared for. Due to the ability to fully automate every imaginable workflow step and the maximized performance everything is prepared and ready to improve your turnaround times.

Océ PRISMAproduction – meet your deadlines and increase your business.

Maximize flexibility

With frequently changing applications and quickly changing demands in the market systems are needed which can react as flexible as possible. Océ PRISMAproduction can cover this challenge with its modularity and its easy to use configuration. Just by adding small options to the existing system you can enhance it to your new needs without changing the overall behavior.

Océ PRISMAproduction – cover today's demands and prepare for the future.

Powerful solution out of one hand

It is critical in today's production print facilities, in corporate environments as well as in commercial environments, to have reliable vendor support for the long term. By choosing Océ PRISMAproduction you get the opportunity to select the vendor with the broadest portfolio in b/w and full-color high-performance printers ranging from 45 ppm b/w up to 3300 ppm full color and the vendor with an unrivalled professional service organization. Furthermore you build on the experience of thousands of customers, printing billions of pages worldwide.

Océ PRISMAproduction and Océ high-performance production printers – the perfect solution out of one hand.

Océ PRISMAproduction Professional workflow and output management system

Océ PRISMAproduction – the server-based solution

Océ PRISMAproduction Server is a high-performance output and workflow management system for Transaction and Graphic Arts printing environments. The platform can manage a huge range of production printing systems, spanning the full gamut of output speeds and functionalities. Of course Océ PRISMAproduction Server is designed to support Océ's high-performance production printers but it can also handle printing systems from other vendors as well.

Build on a complete modular structure, Océ PRISMAproduction Server offers an unrivalled flexibility in becoming perfectly tailored to the customer needs. It covers the requirements for transactional statement applications as good as for sophisticated graphical arts applications like brochures or books.

Additionally, with its workflow management capabilities you get full control even on process steps in the workflow which are only indirectly related to printing.

Océ PRISMAproduction Server – one system fits all.

Océ PRISMAproduction in the mainframe world

In the transaction document world, you sometimes need to work with mainframe applications. So why not secure a solution that enables you to directly print your mission-critical data from your mainframe, offer possibilities to enrich legacy applications and build interfaces to the server based world.

Print directly from your mainframe to multiple IPDS printers from Océ and other vendors with the SPS module at maximized performance and reliability.

Add indices, bar codes or simple seasonal greetings to your documents without expensive application program changes by using the CIS module.

Download your AFP files and resources in a smart way to the Océ PRISMAproduction Server, or other servers, with the Router module.

Combine the best of both worlds – mainframe and server.

Professional workflow and output management system

Beyond the Ordinary

Printing for Professionals

Creating global leadership in printing

Canon and Océ have joined forces to create the global leader in the printing industry. For our customers this combines Canon and Océ technology with the support of the Océ direct sales and service organizations. Look to the new Canon-Océ combination for:

- Enterprise printing in the office and corporate printroom
- Large format printing of technical documentation, signage and display graphics
- Production printing for marketing service bureaus and graphic arts
- Business Services for document process outsourcing
