Perfecting preparation

océ

Océ PRISMAprepare all-in-one preprint software simplifies job preparation from composition through production. Whether you're collecting and cleaning up pages, enhancing documents, adding watermarks or logos, creating and applying templates to automate the makeready process, Océ PRISMAprepare software accelerates document preparation.

Canon
CANON GROUP
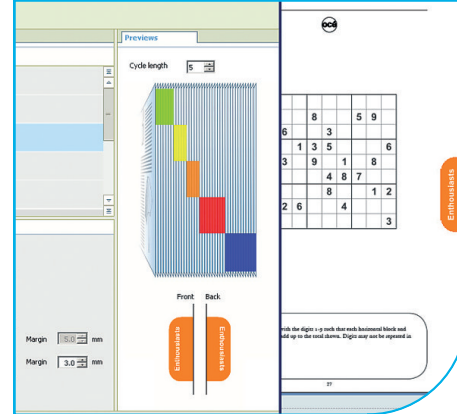

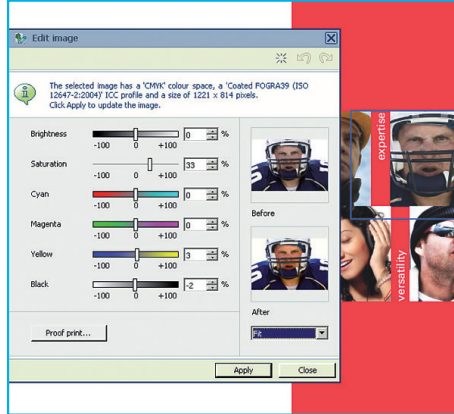

Professional document makeready made easy

Device-independent Océ PRISMAprepare software unleashes the full power of Océ cutsheet printers, including the Océ VarioPrint DP Line, Océ VarioPrint® 4000, VarioPrint 6000 Ultra Line, Canon imagePRESS® series, Canon imageRUNNER® ADVANCE series and other Océ and non-Océ production cutsheet colour systems.

Designed with the user in mind, an intuitive, award-winning user interface enables any operator to master any document preparation task from the simplest to the most complex. True WYSIWYG previews of the prepress workflow accelerate productivity, while minimising the need for hard-copy proofs. The ability to create and apply predefined templates further automates the makeready process. With the flexible impositioning you can print virtually every layout possible to get even more productivity from your cutsheet printer.

New features and enhancements

Océ PRISMAprepare 5.3 adds key capabilities such as:

- Basic PDF preflight, including auto-correction function: Nine editable rules for 80% of the most common mistakes
- Show and print PDF annotations
- Replace stroke and fill colours
- Add images to tabs and spine
- Personalised toolbar
- Extention of imposition schemes: signature books, multi sub booklets and custom schemes
- WYSIWYG preview of printed sheets
- Feedback to user if printer is able to print job

General	
Documents	PDF files: up to 2000 pages PDF page size: 5 - 1500 mm
